InTice™ BORDER PATROL™ SYSTEM

InTice™ Border Patrol™ System is a durable plastic bait station with four downward facing openings under the lid to easily let in pests and keep moisture out. It has a dark green color and Discreet design making it the perfect perimeter defense system. The Border Patrol™ System has a keyless, snap-on lid and a simple anchor spike on the bottom, so it's easy to install and service. It's perfect for setting up a proactive perimeter defense to keep crawling pests at bay and keep bait fresher, longer.

Designed with the InTice™ Gelanimo™ 4 oz cup in mind, the Gelanimo™ cup top is simply removed and the cup dropped into the Border Patrol™ (pictured at left). With patent-pending Gelanimo's unique rigid gel formula, there is no need to worry about spills, mess or ants drowning. It's the easiest way to set up a reusable perimeter defense for ants. InTice™ Border Patrol™ Systems also work well with InTice™ Granular Bait for controlling a wide range of crawling pests.

Product Code: IBPS012 - box of 12 stations
