# Bio Bullet™

*Super-Concentrated Premium  
Microbes for Grease Trap  
Maintenance and Other Bio  
Remediation Applications in a  
Slow-Dissolving Solid Block*

**InVade™ Bio Bullet™** is a solid microbe-laden block for use in degrading organic waste in lower flow systems such as restaurant grease traps. The non-toxic, naturally occurring bacteria are present in high numbers to handle difficult organic problems. The unique block will gradually dissolve over a 30-90 day period which allows for continuous treatment and degradation

of waste. The bacteria contained in the block will reduce sludge, fats, oils and grease buildup, as well as other food-based waste and odors. InVade Bio Bullet can also be hung from drain covers to continuously treat scummy, slow or smelly drains. The new “minis” are excellent for placing in soda fountain drip trays, condensation pans, and small drains.

**Label and MSDS are available at [www.rockwelllabs.com](http://www.rockwelllabs.com).**

**Product Code:**

**IBBM015 - 15 x 100 g minis**

**IBBL121 - 12 x 1 lb bullets**

**IBBL405 - 4 x 5 lb bullets**
