Application Directions

Use Sites: lawns, landscape beds, ornamental turf, parks, playing fields, right-of-ways, golf courses, and home greenhouses.

Apply bait evenly over the affected area using a hand shaker or mechanical spreader at a rate of 1 lb per 1000 square feet or 45 lbs per acre. The product should not be watered in. For mole cricket treatments, results will be best if the area is irrigated prior to bait treatment. Mole crickets typically come to the surface to feed in the evening. Individual ant mounds may be treated by sprinkling 1/2 oz of product around each mound. For snails and slugs apply early in the season to areas likely to be infested and repeat monthly for satisfactory control. In home greenhouses, evenly spread bait at a rate of 3 oz per 100 sq ft on and under benches. Keep off of flats and pots.
