

InVade™

bio zap

Ready-to-Use Liquid for Quickly Eliminating Organic Odors, Excrement, Organic Waste and Fly Breeding Sites

InVade™ Bio Zap is an extremely versatile, ready-to-use microbial liquid. It can be sprayed on carpets, walls, and fabrics to eliminate odor from pets, smoke, excrement, and other organic matter. InVade Bio Zap can also be sprayed into garbage receptacles, urinals and other bathroom areas to digest scum and eliminate odor. For fly management applications, spray in cracks

and crevices and on surfaces where scum build-up allows flies to breed. Organic odor resulting from mold, mildew, or animals can be eliminated by spraying InVade Bio Zap on gravel or soil surfaces, crawl spaces, concrete in basements, and garages, or insulation in attics. The addition of citrus oil provides a fresh scent. InVade is natural, biodegradable and non-pathogenic.
