

InVite™ multi-lure oil

***Contains Pheromones for A
Variety of Beetles and Moths***

Blended in a Food Attractant Base

***Cigarette Beetles, Red and Confused
Flour Beetles, Warehouse and
Khapra Beetles, Plodia and Ephestia
Moths***

InVite™ Multi-Lure Oil

contains pheromones blended in a thickened food oil that both protects the pheromone before release while providing a more uniform release over time. The food oil also acts a food attractant for a variety of pantry pests.

InVite Multi-Lure Oil is packed in tubes with cotton balls included. Each tube is one or two doses for beetles, and one to three doses for moths. The InVite Multi-Lure Oil is ideal for use in the D-Sect IPM Station and may also be used in the Yellow Hanging PFT Station with water.
