

InVite™

multi-moth lure

Rubber Septa Pheromone Lure for Plodia and Ephestia Moths

**Indian Meal Moths, Tobacco Moths,
Almond Moths, Mediterranean Flour
Moths, Raisin Moths**

InVite™ Multi-Moth Lure is a rubber septa style lure impregnated with pheromone.

Easy to use, the septas can be placed on any glueboard - folded or flat, hanging, or on a shelf or counter. They can also be used on the D-Sect glueboard inside the D-Sect Station. This use is perfect for retail stores in the pet food and birdseed aisles or other areas where a discreet, "smush-proof" monitor is needed. The lure will last for about 6 weeks and can be thrown away or put on another glueboard if the original glueboard gets full of moths while the lure is still active. Glueboards are not included.

**Label and MSDS is available at
www.rockwelllabs.com.**

**Product Code: IMML012
pack of 12 individually wrapped lures**
