

InTice^{Smart} ant gel

InTiceTM Smart Ant Gel is a new gel bait for control of a wide range of pest ants. Many people remember the old “OutSmartTM”¹ product that was popular several years back. That product was very popular due to its great acceptance by ants and the fact that it did not get runny even in hot weather. In investigating this product over the last several years, we have found that one of the keys to its success was the fact that not only did ants accept it quickly, but that they were able to continue feeding on it, even as the bait dried, i.e., it didn’t tend to “skin over” in such

a way that the ants could not feed. After several years and over one hundred test formulas, we have been able to replicate these desirable properties. New InTice Smart Ant Gel is thick and sweet, just like you remember. It is individually packaged in fully labeled boxes containing one 1.5 oz (42 g) syringe with the plunger installed. Twelve boxes come in an outer counter-top display carton. Try it today!
