

InVade^{mini}

bio bullet

InVade™ Bio Bullet Minis are 100 gram “pucks” measuring 2.75” x 0.75”. Each puck contains 2.5 billion microbial spores and enzymes to break down proteins, carbohydrates, urine and other waste. InVade Bio Bullet Minis are perfect for use in urinals, soda fountain drip trays, condensation pans, toilet tanks and any other area where waste breakdown, odor elimination, and fly breeding prevention are desired. The odorless pucks last 30-60 days depending on throughput.

Product Code: IBBM015
Case of 15 - 100 g pucks
