

Rapid Cricket Carnage:

Carrie Campbell, of Hatfield Pest Control, gave InVict Xpress a try

I was checking glueboards in a sensitive healthcare account and noticed quite a bit of cricket activity. Since it was a sensitive account I knew my options were limited but a Rockwell Technical Rep had recently introduced me to **InVict Xpress Granular Bait**. I was impressed by the low application rate and the fact there are no PPE requirements so I decided to give it a try. WOW, we observed very quick results and two weeks later there's hardly any sign of cricket activity. **InVict Xpress** also has an impressive range of use sites and target pests so we've been expanding our use of the product to other accounts with equally encouraging results. I'm confident **InVict Xpress** can handle even the toughest situations.
